Coordinating Your Care in the Community

What is a Health Home?

About Brooklyn Health Home

A 'Health Home' is not a place; it is a group of health care and service providers working together to make sure you get the care and services you need to stay healthy.

Once you are enrolled in a Health Home, you will have your own **care manager**. Your care manager will work with you to set up a care plan and appointments and get the services you need to put you on the road to better health.

A Health Home can connect you with:

- Health care providers
- Mental health and substance abuse providers
- Medications
- Housing services
- Social services (food, benefits, and transportation)
- other community programs that will support and assist you

Brooklyn Health Home will connect you with physical and behavioral health providers, as well as your own care manager to support and advocate for you.

Brooklyn Health Home will not replace the doctors and other services providers you are happy with - we coordinate the care you already have with new services you may need. Your care manager will meet with you one-on-one to:

- Pay special attention to your needs
- Help you stay healthy
- Ensure you get an annual physical, regular screenings and other medical care
- Connect you to other services such as housing and food programs

These extra services are **free**. You will receive only the services you request.

Is a Health Home Right for You?

Do you qualify? If you are a Medicaid recipient, believe you may qualify for Medicaid, and answer yes to any of these questions:

- Do you have chronic or mental health conditions for which you need regular doctors care?
- Do you need assistance with finding health care providers?
- Do you have difficulty keeping medical appointments?
- Have you visited the emergency room or hospital multiple times in the past year
- Are you staying in a shelter, on friends' couches, or at risk of being evicted?

Brooklyn Health Home could be right for you.
